

Problem

People who attend long meetings/conferences often get overwhelmed with the amount of information provided to them. In order for them to understand everything a summary of the key points is necessary. This is the problem that we are solving with Concise.

Solution

Speech
to Text

Distribution

Emotional/Verbal
Summary

1. Detect Emotion in Crowd
2. Translate Speech of Speaker into Text
3. Summarize & Distribute Analytics

Iterations

NEXT ITERATION:

- distinguish between diff speakers
- send analytics with timestamps
- handle multiple languages besides english
- differentiate between speaker voices
